Download Old Version Of Skype For Mac 10.6.8

Many affected Skype users who were unable or unwilling to update to OS X Mavericks in order to get the latest Skype builds took to the to voice their complaints.. What the company didn't say, however, is that some old platforms require these old versions, meaning some Skype users are essentially being dropped.. Allen, That was fast! I knew that my colorful post will have an effect, so it was intentional.. 15 version for Mac OS X 10 6 8 but it does not work! Is anybody here listening and reading complaints posts from back in June 28? Post edited to conform with the.. The latest version of Skype (version 6 19) does indeed require OS X Mavericks, but certain older versions of the software for OS X Leopard through OS X Mountain Lion are still supported.. What provision is being made for the millions of Mac users who use Snow Leopard, Lion, and Mountain Lion? NONE WHATSOEVER! And there is no MSN chat or email support, as falsely stated when you start Help from the My Account page.. In response, Microsoft has clarifying the situation The company states that the concerns over Skype support for older versions of OS X are based on a misunderstanding.. Skype now tells me that 'We've signed you out because you're using an outdated version of Skype.. However, to direct the users of 10 6 8 to a web version of Skype - which BTW I tested and is awful - is an unprofessional and unsatisfactory answer to the problem faced by the huge amount of Mac users that stayed with Snow Leopard because of its reliability.

15 DOES NOT work anymore! Don't you think that we, the users of Skype since it's inception, before MSN bought it and added it to the rooster, deserved that kind of statement spelled out clearly on the Skype pages? Or is it the corporate 'political correctness' BS, the scourge of modern times, which stopped Skype short of such announcement that would have definitely upset the masses?.. Version 2 8 is the version of Skype we like best on the old G3 system Are they going to refund our skype in and out money we purchased in order to call land lines from our computers? Rating: 7 Votes.. In June, Skype announced plans to retire old versions of its Windows and Mac clients “over the next few months,” and then expanded the move in July to “all platforms” along with another vague “in the near future” timeframe.. Therefore, if you need to download Skype for Snow Leopard, for example, make sure you do it while using a Mac running Snow Leopard.. MSN had managed to ruin the best app ever, as expected I'm using 10 6 8 on a mbpro 2011 and I got locked out of my continuously running Skype 6.. In short, Microsoft says that it isn't “retiring” every older version of Skype, and that the latest version supported on each of the aforementioned operating systems will still be able to work with the service.

Download the latest version' - which of course does not run on Snow Leopard You still get directed to download the proper 6.. This seem to me closer to an insult than to a solution THERE IS NO ANNOUNCEMENT THAT Skype 6.. All you get is being redirected to the Community, which of course is us, suckers.. 15 0333 upon log out from Skype and relaunching, because some ***** has hacked my account (and how is that possible on the oh, so secure MSN site is still a mystery) and send spam to all my contacts, in Russian of course.. So, if you're a Mac Skype user worried about versions and support, here are the correct versions (as of today) that you should grab: OS X Mavericks: OS X Mountain Lion: OS X Lion: OS X Snow Leopard: OS X Leopard: Note that the links above will automatically detect your current operating system and serve the appropriate installer.
